1979 Bathurst Winner HDT A9X Torana

Biante is proud to announce the upcoming release of our 1:18 Holden Dealer Team Torana A9X as driven to victory by Peter Brock and Jim Richards in the 1979 Hardie Ferodo Bathurst 1000. Brock and Richards dominated this event with pole, a six lap winning margin and fastest lap on the very last lap. With the intervention of safety cars in the races since there will never be a more dominant Bathurst 1000 victory again.

This car features new interior pieces including seats, steering wheel, door trims and new left side exit exhaust. The most important new addition however is the inclusion of a race driver figure of Peter Brock at the wheel. Resplendent in red overalls with sponsor logos and red, white and black full-faced helmet, this figure adds a degree of life to this significant Bathurst winning replica. The figure is fully belted in the car and grips the steering wheel with a nice relaxed 'Brock-like' grip.

The addition of this driver figure is a first for Australian released 1:18 diecast model cars.

This model is set to become one of the most collectible cars we have ever produced and will be supplied with a signed certificate by Peter Brock and forms part of our Peter Brock Collection.
